Mr. Ross Fraser reports recently phoning to his brother, Murray, and family, at Havelock, Ont. Mrs. Fraser also talked to members of the family.

Jim Barber, Tom White and Basil O'Rourke left Monday on a hunting trip in the Coleman district.

NOTICE TO CREDITORS AND CLAIMANTS

In the matter of the Estate of Ann Barber, late of Carbon, in the Province of Alberta, Widow, Deceased.

Notice is hereby given that all persons having claims upon the estate of the above named Ann Barber, who died on or about the 29th day of September, A.D. 1950, are required to file with the undersigned by the 15th day of December, A.D. 1950, a full statement, duly verified, of their claims and of any security held by them, and that after that date the executor will distribute the assets of the deceased amongst the parties entitled thereto, having regard to the claims of which notice has so been filed or which have been brought to his knowledge.

DATED at Carbon, Alberta, this 14th day of October, A.D. 1950.

JOS. J. GREENAN,
Solicitor for the Executor,
608 Leeson & Lineham Block,
CALGARY, Alberta

Rev. George Robinson, well-known Alberta evangelist will conduct an evangelistic campaign in the Carbon Baptist Church from Tuesday evening, November 7 through Sunday evening, November 19.

TENDERS INVITED

For the purchase of the School barn in the Mosher S.D. 3426. Tenders will be opened and considered Friday, November 17, 1950. Building to be removed from school grounds. Envelopes to be marked "Tenders." Highest or any tender not necessarily accepted.

Albert W. Poland,
Secretary Treasurer,
DRUMHELLER SCHOOL
DIVISION No. 30,
Box 570, DRUMHELLER, Alta

Farmers' Meeting Draws Good Crowd

The farmers' meeting Monday evening drew a good crowd from the Carbon district and nearby towns. Mr. R. Garrett was appointed chairman for the evening.

Carl J. Stimpfle, F.U.A. president, was the first speaker and stressed the importance of farmers assuming more responsibility in selling their products and not to rely so much on the government in settling their problems.

He urged farmers to press for setting up of provincial, inter-provincial and national farmer producer boards and thus sell farm products direct to the consumer at a parity price.

C. E. Johnston, M.P., in his address said that all industries in Canada except agriculture were being subsidized by the federal government and told of his party's efforts at Ottawa towards this end.

Gordon Taylor, M. L. A., spoke on high cost of living and what could be done about it. He maintained that prosperity of a country could not be any greater than the production of that country and stressed the importance of keeping production at a high level. Mr. Taylor said that money should be brought up to the level of production by creation or other means instead of destroying production, as happened during the depression, to bring it to the money level.

A number of good points were brought up in the question period and several resolutions concerning final wheat payment, possible reduction in price of gas and in come tax exemption for certain types of land improvements were passed.

Ted Schmidt Heads Carbon Curlers

Election of officers and committees took place at the Carbon Curling Club meeting Friday evening and the following appointments were made:

President, Ted Schmidt.

Vice-Pres., Archie McLeod.

Sec.-Treas., Bill Ross.

Executive committee: Sid Cannings, Jack Barr, Jack Barber, Francis Poxon, Chris Thumlert.

Bonspiel committee: Bob Shaw, Len Poxon, Morris Switzer.

Ice committee: Joe Appleyard, Sam Garrett, Francis Poxon, Ed Foster.

Draw committee: Chris Thumlert, Wilf Skerry.

Fees for the coming season were set at \$8.25 for town members, \$6.25 for country members and \$3.75 for school students. Ladies' fees will be \$10 per rink.

It was decided to call for tenders for caretaker and ice making. Separate tenders for each must be submitted to the secretary-treasurer in writing by November 4th.

Dominion and Provincial Commands of the Canadian Legion are conducting a campaign for wearing of poppies by veterans from November 4 to 11, in honor of the fifth anniversary of the declaration of peace. Saturday, November 4, is poppy day in Carbon and all veterans are requested to wear poppies during the following week.

A Valuable Asset

In the future, the recent opening of the oil pipe line from Edmonton will no doubt be regarded as an important milestone in Canada's economic development. The growth of oil production in the west is one part of the great economic expansion which is taking place in Canada at present, and which is marking a new period in the development of this country. At the opening of the new pipe line, Hon. C. D. Howe pointed out that with the rich iron deposits in Labrador, the titanium mines in Quebec, vast forest resources and the Western oil fields, Canada's economic life is undergoing a change and we are entering upon a new and more prosperous era.

Is Likely To Extend Markets

Of all these resources oil is of the greatest interest to the people of Western Canada. The new pipe line will link Edmonton with Superior, Wisconsin, the point at which the oil is transferred to Great Lakes tankers to be taken to refineries in the east. The use of this line promises to greatly extend the sale of Canadian oil in Canada and possibly in new markets in the Middle West of the United States as well. It has been estimated that already Canadian oil production, which has reached the value of \$60,000,000 a year, has saved some 90,000,000 Canadian dollars which would otherwise have been spent annually in the United States on oil and shipping costs.

Great Saving In Dollars

With the expansion of the present Canadian market, and the possible addition of markets in the United States, Mr. Howe told those gathered at Edmonton for the opening of the pipe line that a saving of 150,000,000 Canadian dollars a year may be expected. If this estimate is correct it will have a considerable effect upon Canada's trade balance with the United States. In some quarters it is expected that the saving may be even greater than is now anticipated, for consumption of gasoline and fuel oil has been steadily rising in Canada. In the last ten year period the number of motor vehicle licenses has doubled, and the demand for fuel oil has increased by three and one half times. It is apparent that the Western oil fields are of major importance to Canada now, and that they may assume even greater importance in the future economic life of the country.

Domesticated Deer Has Own Bedroom

COWICHAN, B.C.—Yellow Horn, a four-year-old deer, is getting as domesticated as a cat. For one thing, he's sleeping on a bed most of the time.

The buck has moved in with Mr. and Mrs. G. C. Boyd in this Vancouver Island village. He started by sleeping on the veranda. He didn't take too well to the hard floor and later sneaked into the house at every chance and snuggled down on a bed.

After that, it wasn't long before he was nipping into the kitchen to nibble at a loaf of bread or a bowl of fruit in the dining room.

Yellow Horn was deserted as a fawn on the shores of Cowichan Lake. Loggers adopted him and painted the horns yellow for easy identification by hunters.

The first ice bowl football game was played in Fairbanks, Alaska, by Ladd Field Army post and the University of Alaska, Jan. 1, 1949. Temperature was 25 degrees below zero.

Convertible into Cash At Par Value At Any Time

The "money back at any time" guarantee, annual interest at 2 3/4%, and safety of principal make Canada Savings Bonds an outstanding investment for thrifty Canadians.

Interest on these Bonds is greater than interest received on savings deposits.

NO GOOD AT SCHOOL BUT EARNS HIS DEGREE—In Copenhagen, Denmark, Winston Churchill received an honorary degree of doctor of philosophy. Commented Mr. Churchill: "I was never very good at school examinations, but now I have more degrees than examinations I have passed. And now I am treated as if I were a learned man."

Prairie Wheat Crop Set At 430 Million Bus.

OTTAWA.—The prairies' 1950 wheat crop was placed by the bureau of statistics at 430,000,000 bushels, down 25,000,000 bushels from a previous estimate of 455,000,000.

This reduction in the prairie crop trimmed the all-Canada wheat harvest to 465,000,000 bushels from the previous estimate of 490,000,000.

(The bureau's previous estimate was contained in a crop report dated Sept. 14. Free Press final estimate of 423,000,000 bushels, published Sept. 21, is the nearest private estimate to the bureau's latest figure of 430,000,000 bushels.)

The bureau's estimate of grain covered the period to Oct. 1. It was especially made for the experts preparing papers to be presented at the annual dominion-provincial agriculture conference, to be held here Dec. 4, 5 and 6. The previous estimate of crops was made Sept. 14.

In the new special survey, the bureau estimated that the prairie oats crop would total 255,000,000 bushels, up 4,000,000 from the previous estimate of 251,000,000.

The prairie barley crop was placed at 157,000,000 bushels, down 8,000,000 from the previous estimate of 165,000,000.

This year's totals for prairie grain, however, were well ahead of production a year ago when the prairies produced 337,000,000 bushels of wheat, 190,000,000 of oats and 109,000,000 of barley.

In a breakdown by provinces, Manitoba's Oct. 1 estimate of wheat was placed at 50,000,000 bushels, oats at 67,000,000 and barley at 54,000,000.

The wheat crop in Saskatchewan was placed at 263,000,000, oats at 116,000,000 and barley at 47,000,000.

Alberta's wheat crop is estimated at 117,000,000, oats at 72,000,000 and barley at 56,000,000.

PREDICTING WEATHER

NANAIMO, B.C.—A member of the Cowichan Indian tribe was reported to have forecast a winter of heavy snow for Vancouver Island, and an enterprising reporter telephoned the tribal chief and asked "could you tell me how one goes about predicting this?" Said the chief: "Maybe they listen to the weather reports on the radio."

Funny and Otherwise

At the supper table one night on the farm, the hired man was telling about a breeder who was developing a strain of sheep for speed. "He tells me," the hired man said, "that he's got lamb now that can run forty miles an hour."

"But why does he want lambs that can run forty miles an hour?" asked the bright young girl.

"To keep up with Mary," he replied.

Fair Patient: "They tell me, doctor, you are a perfect lady killer."

Doctor: "Oh, no—no! I assure you, my dear madam, I make no distinction between the sexes."

"Will you try some of my angel cake?" asked the young wife of her husband.

"No thank you," was the reply. "Are you afraid it isn't good enough?"

"No; I'm afraid I'm not good enough."

"Good enough for what?"

"Good enough to become an angel."

An elderly woman bought a cottage on the American-Canadian border. Both governments sent surveyors to find out which country she was in. One surveyor finally said, "I'm positive that your cottage is on the American side by three inches."

"I'm so glad," replied the woman. "I've heard that the winters in Canada are so severe."

A few whispered words to a woman customs officer speeded up a long line of cars slowed by her questioning at the Windsor-Detroit tunnel. The few words which transformed cool efficiency into true feminine agitation and took the woman's mind from her job?

"Your slip is showing?"

Clem—How's your sick pig?
Joe—I think he'll be all right now that I have given him that bag of sugar.

Clem—Why did you give him that?

Joe—Haven't you heard of sugar-cured ham?

To Live Right — Eat Right.

THE TILLERS

—By Les Carroll

ODDITIES IN THE NEWS

Miss Florence Harry-Jones has been elected president of the Young Conservatives of Chingford, Eng. It is the local youth group of the Conservative party. She is 71 years old.

A small dog jumped onto the lap of Mrs. Alice McElligott, 32, of Chicago, his mistress, and knocked her out a third-storey window. She was sitting on the sill, with the window open, when the pooch, Bridgett Ann, leaped affectionately onto her lap. She was thrown off balance and toppled out the window. Her fall was broken by tree branches, and she landed on soft ground. She only suffered minor cuts and bruises.

Lawyer Tom Hurley's Indian client was charged with being drunk at Vancouver. Counsel told Magistrate Oscar Orr: "Your worship, he fell among white people and was led astray." Sentence was suspended.

The teacher was nice about it, but the three children had to leave the room in their school at Cooksville, Ont. After all, the little kitty they found in their baby carriage had been a skunk, and they had been playing with it before coming to school.

GUTTERS OF GOLD

EDMONTON.—Talk about streets being lined with gold — Edmonton's downtown gutters have yielded \$31,534 in cash and securities since Oct. 5. City police constable J. Hallberg found \$30,513 worth of common shares in a book dropped in a gutter. Electrician Anders Anderson picked up \$1,021 in bills from a gutter Oct. 5.

HAD MORE STRIKES

Pennsylvania had more strikes than any other state in 1949, with a total loss of more than 10,000,000 man-days.

Made with Amazing New Fast DRY Yeast!

JELLY BUNS

Measure into small bowl, 1 c. lukewarm water, 2 tsp. granulated sugar; stir until sugar is dissolved. Sprinkle with 2 envelopes Fleischmann's Royal Fast Rising Dry Yeast. Let stand 10 min., THEN stir well. Cream 3/4 c. shortening; gradually blend in 1 c. granulated sugar, 2 tsp. salt, 1 tsp. grated nutmeg. Gradually beat in 2 well-beaten eggs. Stir in 1/2 tsp. lemon extract, 1/2 c. milk which has been scalded and cooled to lukewarm, and yeast mixture. Stir in 3 c. once-sifted bread flour; beat until smooth. Work in 3 c. more once-sifted bread flour. Knead until smooth and elastic; place in greased bowl and brush top with melted butter or shortening. Cover and set in warm place, free from draft. Let rise until doubled in bulk. Punch down dough and cut into 36 equal portions; knead into smooth balls. Brush with melted butter or margarine, roll in fine granulated sugar and arrange 1/2" apart on greased baking pans. Cover and let rise until doubled in bulk. Twist the handle of a knife in the top of each roll to form an indentation; fill with jelly. Cover and let rise 15 min. longer. Bake in moderately hot oven, 375°, about 18 min.

• No more disappointments because the yeast has spoiled! Fleischmann's Fast DRY Yeast replaces old-fashioned perishable yeast because it keeps fresh and full strength — right in your cupboard! For fast-rising dough and grand oven results get Fleischmann's Fast DRY Yeast to-day!

Italy's Basic Problem

Too Many Italians and No Place To Go

By SANFORD MARKEY
(CPC Correspondent)

ROME, Italy.—The nation that on the map resembles a giant boot, is today like the story book old lady who lived in a shoe and had so many children she didn't know what to do.

The government in Rome is flailing over-population its most serious post-war problem. Italy is an area smaller than the province of Quebec and it has a population of over 46 million, about 372 persons to the square mile.

Italy's unemployed figure is two million. America, with a proportionate area-population setup as Italy, would have an unemployment figure of 12 million.

One of Italy's chief exports has been its surplus population that went to South America, western Europe and the United States to fill the demand for unskilled workers.

Today, despite energetic government efforts to find immigration outlets, the post-war flow of Italians abroad has narrowed to a trickle.

The government maintains that at least 200,000 must leave every year to keep unemployment at a manageable state. In 1949, only 160,000 left, and 26,000 of those returned.

The drop in emigration figures is reflected in the amount of money sent back to Italy. In 1928, for example, former Italians sent home more than \$125 million; in 1948, the send-home money was only \$45 million.

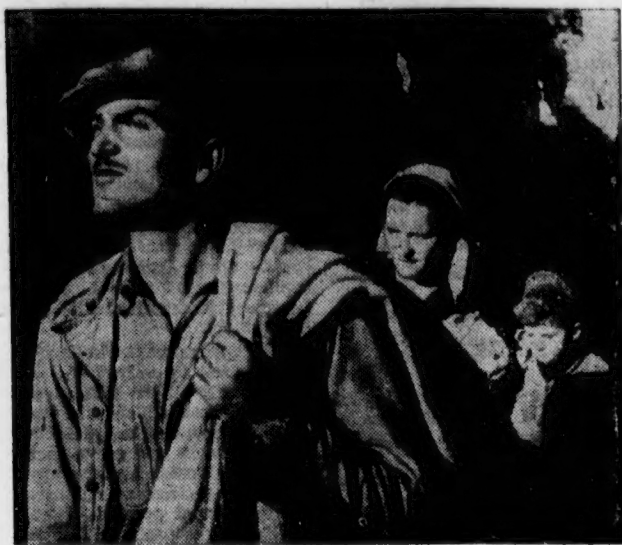

Italy's reservoir of human unemployment is a fertile spawning ground for Communist propaganda and a threat to the country's pro-western regime.

Mussolini sought to solve the over-population crisis by acquiring colonies and sending Italians to North Africa, but Il Duce, even in his best years, never was successful.

Before World War I, Italian immigrants flocked to North America. The United States, however, has long since cut its quotas sharply. Italians also flocked to South America with a large percentage, since World War I, finding homes in Argentina whose immigration treaty with Rome is the most liberal of the nine similar treaties Italy has with other South and Latin American nations.

Even South America is not providing too favorable a source for immigration. Many Italians have written home that they are forced to live in a "frontier" condition; that they are "labor fodder."

These unflattering letters, plus accounts of hard living related by persons who have returned to Italy, have cut sharply into the ranks of those who want to carve new lives in South America.

—Central Press Canadian.

ITALIANS—Is there still hope beyond the far horizon?

Western Europe which took many post-World War II immigrants has reached the saturation point, with such countries as Switzerland, France, Belgium and Holland posting "no immigration" signs.

Italian diplomats have a standing order abroad to investigate all possibilities for immigration. It appears that the only major takers are South America, Canada and Australia.

Since the end of the last war, Rome reports that an estimated 620,000 Italians have left for new lands. The government is now seeking to speed up the flow.

The Economic Co-operation Administration has been contacted for \$10 million to be used for both new ship construction and travel expenses. ECA, however, has told Rome

that emigration is not the answer to Italy's over-population.

Spurred by both ECA warnings and the reminder that communism breeds best with discontent, the government in Rome has announced a series of proposed undertakings to ease the unemployment crisis.

One program calls for a vast land resettlement project to put 500,000 persons on new farms.

Another calls for increased industrialization to provide several hundred thousand jobs, while a third proposal includes a vast public works undertaking to give jobs to more than 100,000 persons.

The failure to find employment has resulted, too, in a drop in the nation's birth rate, from 23.8 per thousand to 21.6 per thousand in 1949.

Dairying Gives High Returns

Surveys made in the Canada Department of Agriculture, Ottawa, show that the cash income from the sale of dairy products is greater than the revenue from any other agricultural product with the exception of wheat. If the returns from the sale of dairy cattle for export and slaughter are included, then the total cash income from dairying exceeds that of wheat and approximately 25 per cent. of the total cash income from farming.

Another point that is often overlooked when considering dairying in the national economy of Canada, is the part that the dairy animals themselves play in home and community life in helping to put agriculture on a more permanent basis.

While no one particularly likes doing chores, most farmers become attached to their animals and they soon become a part of farm life. They serve also to give children an understanding of life that proves invaluable to them and through their calf clubs boys and girls are given an opportunity to learn sound farming practices, and what is more important, to become good Canadian citizens.

In England during Oliver Cromwell's time there was a Puritan who named his four sons Locewell, Dowell, Diewell and Farewell.

Push-Button Motoring

With the accent on push-button motoring, a sleek new British convertible recently made its debut at the Paris Motor Show. Just about everything that can possibly be done automatically has been taken care of.

Push-buttons open doors and raise or lower the hydraulically-operated windows and car top. Shutters concealing the headlights flip open when the lights are turned on. The driver can extend or retract the telescopic radio aerial without putting his hand outside the car, and a touch on a switch quickly adjusts the seat.

Not strictly a "gadget car" by any means, the roadster has some interesting points to offer on the performance side, also. Besides the three forward speeds and reverse it comes equipped with hydraulic overdrive. As for acceleration, in just 14 seconds and with two occupants it reaches 50 m.p.h. from a standstill, say the makers. Top speed is 85 m.p.h.

The car is a "two-three" seater and light metal alloy is used for the body in what is called "double skin" construction. Incidentally, the automatic control mechanism is concealed between these two layers of metal.

REMARKABLE PAINT

The paint in the rock-cut temples of Ipsambul, Nubia, apparently is as bright today as when it was put on 4,000 years ago.

To Live Right — Eat Right.

'OVER THE RIVER, AND INTO THE TREES'

On The Side : E. V. Durling

That Beltline

Many wives are extremely critical as to middle-aged husbands who have that bulge around the middle facetiously referred to as "a corporation." They want their husbands to go in for some streamlining, but believe this should be done entirely by diet and exercise. Although they themselves resort to a variety of means of figure compression to attain a streamlined appearance, they do not approve of a husband doing likewise. There are appliances called "massage belts" which will give a man a streamlined appearance and eventually clip his figure off around the middle to such an extent he will not require any artificial aid. Instead of co-operating with a husband who wears one of these belts the average wife makes it a subject of ridicule. She refers to it as his "corset" or his "girdle." When angry with her spouse the wife will often make this reference in a very sarcastic tone, saying: "Don't forget your girdle, darling." It is no wonder most husbands refuse to go in for figure streamlining.

Pick Your Fish

The Hotel Russell in Dublin features in its restaurant a glass tank in which a number of rainbow trout are kept. A patron desiring trout points out the fish he desires to consume. The fish is captured with a net and hurried to the kitchen. This is by no means a new idea. They had such a tank in the Hotel Cecil, London, many years ago.

One Way Around It

High on the list of the world's best chinaware is that made in Belleek, County Fermanagh, Ireland. This chinaware enters Canada duty free. There is a tariff charge of 70 per cent. on it in the United States. However, there is nothing to prevent a resident of the U.S., desiring some of this marvelous chinaware, from going to Canada as a tourist and bringing \$100 worth duty free.

That World Calendar

The World Calendar association is still battling vigorously for its idea of having the calendar changed. Its members are growing optimistic. They say we might have the new calendar in 1956. If so there will always be 28 business days in every month. New Year's Day and Christmas will always be on Sunday, December 31 will be a "W-day." That is a holiday for the whole world. There will be a June 31st every leap year. This will also be a "w" day. Despite the optimism of the W.C.A., I doubt the calendar will be changed. Not in our time anyhow. It would cause too much confusion.

No More Surplus Women

"No More Surplus Women." That is the title of a book by Prof. O. K. Lovejoy, of England. It is now in its 35th edition. In this book Prof. Lovejoy advocates two wives for every man. Following this system, says the professor, would provide every woman with a husband. The Lovejoy matrimonial system calls for a "first wife" and a "reserve wife." Both would have equal rights. But the husband would be the supreme boss. One wife would do the housekeeping the other would go out to work. The husband to be the judge of which wife should do what. The two-wife suggestion of Prof. Lovejoy seems somewhat fantastic but, nevertheless, many unmarried women think it is a good idea.

Object of Sympathy

A feminine resident of Paris was arrested for stealing 474 handkerchiefs from her employer. "Why did you do this?" the judge asked her. "I had hay fever," she replied. . . . When a man dies on the island of Yap his brother inherits his wife.

A Reason For It

The reason some saleswomen, waitresses and telephone switchboard operators are inclined to be disagreeable is because they are suffering from frustration. This is caused by their not really liking their jobs, or because they are unhappily married. That's what a student of feminine psychology claims. Keep this in mind. If a saleswoman acts surly, if a waitress practically tosses your food on the table and snaps at you, or a telephone operator does not give you the voice with a smile treatment, don't become angry. She is more to be pitied than censured. Maybe some male has done her wrong. Perhaps her husband didn't turn out to be the "dream man" she thought he was.

Blue Marching Tune

When the Argyll and Sutherland Highlanders regiments of the British army landed in Korea a band from a U.S. Negro regiment was among those on the dock to receive them. The band first played, "God Save the King," and then suddenly switched to the "St. Louis Blues." This made a great hit with the Highlanders. After the "St. Louis Blues" was played one of the Highlanders cried out: "Play 'Take Me Out to the Ball Game.'" The band obliged.

Use Popcorn For Packing Purposes

PHILADELPHIA. — Popcorn is a pretty good substitute for excelsior, saving as much as 75 per cent. in packing expense and 30 per cent. in mailing costs, says a New York shipper.

The idea of using popcorn in packages won an award for shipper Harold Frick of the Society of Industrial Packaging and Materials Handling Engineers Exposition.

Spokesmen for the expedition said that popcorn idea really works. A package wrapped with shredded paper that weighs nine pounds would tip the scales at only six if packaged with popcorn.

In addition, there is less chance of breakage.

Sugar From Albata

The Lethbridge Herald, which does not propose that the light of Southern Alberta should be hidden from the world, takes a big section in an issue recently to tell about a new sugar beet factory just completed at Taber by Canadian Factories Limited.

This is the third of Southern Alberta's plants, and the largest. It cost \$5,500,000, is designed to process 2,400 tons of sugar beets in 24 hours.

Canadian Sugar Factories owns plants also at Raymond and Picture Butte, in South Alberta, has more than \$10,000,000 invested in the three plants which can handle 5,500 tons of beets a day. That tonnage of beets, says the Herald, would produce 150 million pounds of sugar a year.

This sounds like news of extreme importance to Southern Alberta, and thus to the whole of Canada, because what is good for one section is good for all. But particularly for the area served so competently by the Lethbridge Herald it means a steady market for a profitable crop, more money in circulation, in general a higher degree of prosperity.—Ottawa Journal.

REST IMPORTANT

Rest is the most generally prescribed remedy for many ills. And, remember that not only time in bed is to be counted as resting. Short periods of relaxation spaced through the day are most important—and helpful. 2905

GEMS OF THOUGHT

FORTITUDE

Fortitude I take to be the quiet possession of a man's self, and an undisturbed doing his duty whatever evils beset, or dangers lie in the way. —John Locke.

Our great Way-shower, steadfast to the end in his obedience to God's laws, demonstrated for all time and peoples the supremacy of good over evil, and the superiority of Spirit over matter.—Mary Baker Eddy.

Let us have faith that right makes might, and in that faith let us dare to do our duty as we understand it. —Abraham Lincoln.

There is a strength of quiet endurance as significant of courage as the most daring feats of prowess. —Tuckerman.

Let us not be weary in well doing: for in due season we shall reap, if we faint not.—Galatians 6:9.

HERE'S HEALTH

Master Fimble likes his dentist; Visits to him cause no fears. And such early care's ensuring Healthy teeth in later years.

Tito cut Yugoslavia's bread ration 10 per cent. Even for him that's a lot of crust.

There's a lot of sentiment for the U.N. to have a standing army. The army part sounds all right, but any infantryman will argue there's already too much standing.

The agriculture department says it's the middlemen that make food prices so high. That just about covers everyone.

In fact, under the circumstances, we wouldn't be surprised if the movement became nationwide—wide being spelled with a capital W.

World Happenings Briefly Told

Construction of a nurses' home in conjunction with the new union hospital at Carrot River, Sask., got under way Oct. 2. It will cost \$8,000.

Twenty-thousand metric tons of Canadian wheat worth more than \$1,500,000 were bought by Chile for domestic consumption.

Sugar has gone back on the ration list in Hong Kong. The Crown Colony government blamed limited supplies and a failure of price control.

Radioactive atom "seeds" were flown from Britain to Poland recently, the first time such a consignment has gone to an iron-curtain country. They were used for an operation in a Warsaw hospital.

Once again the British baker man may bake a Christmas cake as large as he can. The Food Ministry lifted an order restricting iced and decorated Christmas cakes to a maximum weight of four pounds.

Pakistan and the United States have agreed to exchange students and promote other educational purposes, the U.S. State Department said. Pakistan was the 20th country to sign such an agreement.

FASHIONS

Gift Ideas!

Anne Adams

FOUR gay aprons for you to make from this pattern! Sew right now for Christmas, bazaars, and yourself! Thrifty to use scraps!

Pattern 4694; sizes small (14-16), medium (18-20), large (40-42). Apron with bib, all one fabric, small size, 1 3/4 yards 35-inch.

This pattern, easy to use, simple to sew, is tested for fit. Has complete illustrated instructions.

Send twenty-five cents (25c) in coins (stamps cannot be accepted) for this pattern. Write plainly size, Name, Address and Style Number and send orders to:

Anne Adams Pattern Dept.,
Winnipeg Newspaper Union,
60 Front Street W., Toronto.

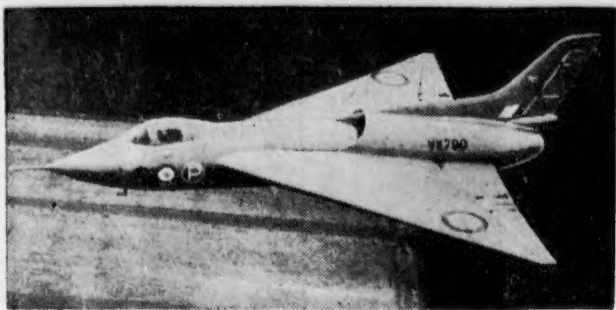

Send Twenty-five Cents now (in coins) for our Fall and Winter Pattern Book by Anne Adams. The best of the new-season fashion in easy-to-sew patterns for all. Christmas gifts, too, plus Free a thrifty pattern for making a child's dress from a man's shirt.

DONATIONS COMPULSORY

BUENOS AIRES.—All workers in Argentina must donate two days' pay each year to the Eva Peron Foundation, a welfare organization directed by the president's wife. The Labor Ministry instructed employers to deduct pay for May 1 and Oct. 12 from the workers' envelopes and deposit it within 48 hours in the National Bank.

ARE HANDICAPPED

French railroads are trying to carry 132 per cent. of prewar traffic with only two-thirds of prewar equipment.

TRIANGLE WING FOR SUPersonic SPEED.—This is the first flight photo of the Avro 707, Britain's new delta wing jet plane. The wing configuration, it is believed, will permit controlled flight at and beyond the speed of sound. The designers expect that the Avro 707 anticipates the shape of the aircraft of the future. No details of the craft's performance have been made available.

Veteran Sourdough Collects Particles Of Gold From Alberta Rivers

DEVON, Alta. — Alberta's rivers are still singing the songs of the sourdoughs and Thomas Staley says it beats everything.

The way Staley pans gold today everything pans out fine, because he's virtually got the Alberta government working for him.

A little guy with a battered hat on the back of his head and a bit of graying bristle on the chin the 64-year-old sourdough will shift his chaw of 'bacca and tell you he pans gold the same way they did 50 years ago—but he has a new twist of his own.

He has two spots on the North Saskatchewan River in this Leduc oil country. Six others are working the waters thereabouts, but Staley has a spot where the government is building a bridge to replace the historic Devon Ferry, overworked by the oil boom.

Gravel for the bridge construction is washed right at the site and a long flume carries the water back to the river. Staley has lined the flume with 20 feet of blanket. All he has to do is drop around once in a while and pick up the pretty gold particles left on the blanket.

At the other location he has a mud box, 20 inches wide and four feet long, with blankets on the bottom and a screen on the top. He shovels sand into it and a one-horsepower motor pumps water from the river to wash it. He catches the gold particles on the blanket.

It takes a lot of shovelling at this spot, but the stuff he sends to the Vancouver Assay Office brings \$28 an ounce and he clears about \$6 a day. He splits with the gravel people his take from the flume.

Old Tom, who got his first touch of gold fever on the Fraser River, has been working the North Saskatchewan "for nigh on 16 years".

You can't drift into success.

Weekly Tip

GREASE SPOTS

Avoid hanging grease-spotted fabrics in the sun until after they have been cleaned. The action of the sun's rays causes the grease to penetrate more deeply.

Bank Of England Publishes Survey Of British Investments

Bank of England has at last published a serious and careful survey of the decline in British investments abroad, between 1938 and 1948. It must be remembered that this includes the greatest period of post-war Socialist extravagance, as well as the Second World War.

Total British investments abroad fell from £3,545 million to £1,960 million. Investments in Commonwealth countries and colonies fell from £1,998 million to £1,110 million. Investments in Argentina fell from £369 million to £51 million. Investments in the U.S. fell from £260 million to £75 million.

While investments declined by 45%, income fell by only 25%. Actually, in the case of the U.S. investments, income increased, despite the fall in nominal values of investments.

Evidence is now complete that the decline in British investments abroad, especially in income from these investments, cannot possibly be the cause of British economic difficulties. Gifts and long term credits from North America alone far exceed the total loss of British overseas investments in the war and post-war period.

Certainly, whatever may have happened to the value of British investments in the U.S., the fact remains that, in 1948, these investments brought Britain in more \$U.S. than they did in 1938.

INSUFFICIENT FUNDS

Freeing of the Canadian dollar has left New Zealand importers with insufficient funds for orders placed with Canadian manufacturers.

An example of a trial bid from match play. Both South players opened One Spade and rebid Three Diamonds over a single raise from North, who then jumped to Four Spades on the strength of his Diamond honours.

In both rooms West led ♠ 5 to East's ♠ K and South's ♠ A, and ♠ K followed. In Room 1 ♠ 7 was led to ♠ A at trick 3, and the finesse of ♠ Q lost to West, who returned ♥ 2. Dummy was entered with ♠ 10 and South made game by picking up East's ♠ J. A Club attack defeats the contract. West can place his partner on the bidding with ♠ K, and should lead ♠ J at trick 5.

In Room 2 East made the pretty false card of ♠ 9 when South led ♠ K. Placing West with ♠ J 6 4 2, South continued with ♠ Q and East's ♠ J had to make.

FREAK ACCIDENT

Merl Sederstrom of Stillwater, Minn., drove his car into a dog with such force that the animal hurtled through the air and hit David Hanson, a boy walking nearby. Hanson was injured and the dog was killed.

WARTIME PILOTS STEP INTO R.C.A.F. HARNESS AGAIN.—Like many others who have answered the call of the R.C.A.F. again, C. J. Herbert of Ottawa has family responsibilities now. He is one of the estimated 600 wartime pilots who will take a refresher course under the R.C.A.F. training scheme "Chipmunk," to maintain a reserve of trained airman for Canadian defence. Flying clubs in Ottawa, Windsor, Montreal, Regina, Hamilton, Edmonton, Calgary, London, Toronto, Vancouver, Fort William, Moncton, Brantford and Victoria will collaborate with the R.C.A.F. in the plan.

PART OF CANADA'S Special Service Force, armed and ready for battle, are at Fort Lewis in the U.S. The soldiers are all volunteers destined to serve as United Nations troops overseas. Above for the first time in history the Canadian flag flies over Fort Lewis. It will continue to fly until all of Canada's troops in the special brigade have been staged through to overseas bases. Here the flag is removed from the halyard following the sounding of retreat by Cpl. Robert Band, left, of Regina, and Pte. Victor Maranda, of Montreal and Kingston.

AMERICAN ENGINEERS enlist the aid of South Koreans in the construction of an improvised log roadway over a shallow river to keep a tank column moving northwards towards advance infantry units.

SHAH OF IRAN WEDS DAUGHTER OF REBEL CHIEF—This close-up of Mohammed Reza Pahlevi, Shah of Iran, and his bride-to-be, 18-year-old Soraya Isfandiari, was made as they appeared at the formal betrothal ceremony in Teheran's marble palace. It will be the second marriage of the ruler of the oil-soaked country. He divorced Princess Fawzia, sister of the king of Egypt, in 1948 because of her failure to produce a male heir. The bride-to-be is the daughter of a rebel chief who led a revolt against the Shah's father in 1929.

Canadian Fashion

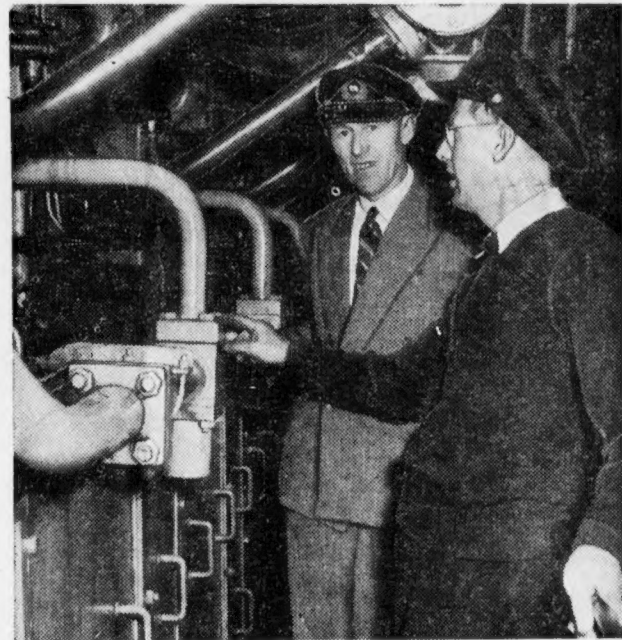

SUITED IN GOLD—Jean Desses chose tinteir gold for this suit trimmed with ocelot dickey and cuffs with matching hat.

The Navajos, the most numerous Indian tribe in the United States, number more now than when the first Spaniards penetrated the southwest. They number 50,000.

FAMOUS HORSES TO PERFORM IN CANADA.—Heir to the tradition of the Spanish Court riding school in Vienna, Austria, this stallion is one of the world famous Lippiza horses that will perform in Canada for the first time in history. The riding school, founded in 1572, has been Europe's most famous academy for centuries. Col. Podhajsky, head of the academy, shows how the Lippizas respond to the slightest touch. The troupe will appear at the Royal Winter Fair in Toronto in November.

THE NORWEGIAN FREIGHTER Lidvard recently made her first voyage to Montreal since an escape from the Vichy French controlled port of Dakar in North Africa in 1940. In the photo above Capt. O. J. Brune and her present chief engineer, Reidar Lea, point to the important machine parts removed by the Vichy Police to render an escape impossible. The chief engineer, at that time, B. J. Mordal remade the missing engine pieces from scraps of metal and went to Dakar authorities to get the originals long enough to turn over the engines to prevent rusting. During the time allowed by the authorities to turn the engines over Mordal switched the remade part with the originals and the police took ashore the home made parts not knowing the difference. A few days later the ship stole out of the harbor under cover of darkness. An effort of the Vichy French to catch her with submarines and escort craft was fruitless.

OPEN AIR BARBER SHOP IN KOREA.—Although his home and shop were destroyed, this barber's precious chair remained intact. Here, he is busily engaged plying his trade in Seoul, in the midst of the rubble of war.

FARM MECHANICS

Edited by Prof. L. G. Heimpel
Agricultural Engineer, Macdonald College, Que.

POULTRY raisers frequently find their flocks to be in greater danger from two-legged skunks than the four-legged variety. A good dog is a great help to give warning and protection against both, but the best of dogs sometimes naps on the job or wanders off to visit a lady friend.

The only guardian which may be reasonably guaranteed not to nod on the job is an electric burglar alarm system. There are several ways of protecting poultry houses and other farm buildings with burglar alarms which can be operated either by battery current or from power line current. The accompanying illustrations show how such systems are usually installed. There are two kinds of systems, one called the "open circuit" and the other the "closed circuit" system.

In the open circuit system the alarm bell is usually placed in the residence and a source of current is wired in series with the bell, then a two-wire line is run to the building to be protected. All doors and windows in this building are fitted with switches or connectors which will make contact when a window or door is opened. This completes the circuit, causing current to flow through the bell windings and set it ringing. When such a system is installed it is best to hide the wires connecting the two buildings as much as possible because if they are seen they can be cut and the alarm is put out of commission.

The closed circuit system is considered more desirable but is somewhat more expensive to install, as it is necessary to buy a relay which

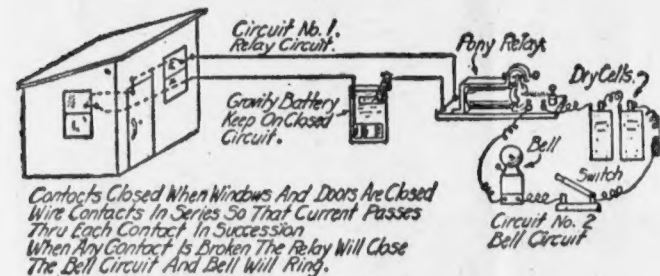

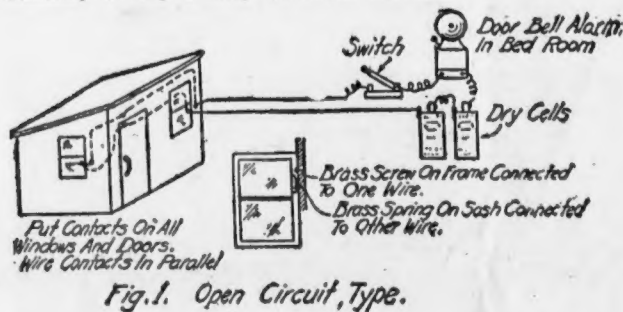

will raise the cost of the system somewhat. In this system all doors and windows in the building to be protected are equipped with switches which are wired in series and which complete the circuit when the doors and windows are closed.

The relay consists of an electromagnet with a two-way contact, and so long as the doors and windows of the building in question are closed a small amount of current flows through the magnet coil, holding the bell contact from closing. As soon as a door or window in the poultry house is opened, however, the magnetic circuit is broken and a spring draws the contact lever of the relay into connection with the bell circuit, causing the bell to ring. The same thing would happen if the wires connecting the poultry house with the residence were cut.

While this system is somewhat more expensive to instal and operate than the open circuit alarm, it is a much more effective protection than is the open circuit system. If you have electrical power on your farm, consult the local manager of the Hydro system as to the availability of the needed equipment.

Another effective method of protecting poultry from burglars is to use the tatoe system of protection. In this method, all birds are tatoed on the skin with some identification mark which cannot be removed without removing the skin.

The best way of utilizing this form of protection is to organize all poultry raisers in a district into a group using this method of defence against chicken thieves.

These burglar alarm systems will provide protection against thieves without falling asleep on the job. The circuit shown in Fig. 1 is cheap to set up and operate but that shown in Fig. 2 is more certain to give good results.

Produce Bottles That Bounce

Bottles that bounce without breakage, the newest scientific contribution to the Household front. Imagine a bottle you can drive over with a car, pound with a hammer, and, more sensibly, drop on the floor without breaking it. They're called polythene bottles and are the latest word in plastics.

Scientists started their search for an unbreakable bottle back in the early 30's. Seeking a container for hydrofluoric acid—a chemical that eats glass—they found their answer in polythene, then available in limited quantities. However, it was only within the last year or two that an efficient method was found to apply "blow" molding, used in the manufacture of glass bottles, to the new plastic.

The results have been sensational. Unlike glass, they are squeezable, and therefore useful for liquid sprays. Unbreakable, they are ideal for use around small children. They are impervious to some acids that affect glass. They are about one-fifth as heavy as glass.

Has science, then, perfected an unbreakable milk bottle? Unfortunately, no. Polythene has not been developed as a food container. But it can be used to hold just about everything in the family medicine cabinet—shampoo, talcum powder, deodorants and cleansing creams. It's the most versatile container since the invention of the glass bottle itself.

Success comes in "cans".

Helpful Hints

Let mud spatters dry on the fabric before you try to clean them off. Then brush off mud as much as possible. Soak washable fabrics first in cool water, then wash as usual. Non-washable clothes may be sponged with alcohol.

If you are troubled with birds (especially pigeons) perching on windowsills and roof, buy some toy snakes in the dime store and nail one to the roof and one to the shutters or sill. One housewife did this and found the birds gave her domain a wide berth thereafter.

If your ice cubes taste stale, it may be due to food odors. To overcome the condition, wash out the refrigerator and trays once a week with a solution of three tablespoons of soda to one quart of water.

To obtain a rich black color when dyeing a dress, use on package of black and one of navy blue dye. Stir the article constantly while it is in the dye bath. Rinse until no more color appears in the rinse water.

NO VIGOROUS EXERCISE

Vigorous exercise is not for the average man or woman who leads a sedentary life up to the age of 50 or 60. Persons who reach that age level cannot with safety, and rarely with benefit, plunge into strenuous exercise.

FIRST LAW PAPER

The first law paper in the west, the Chicago Legal News, was founded by Myra Bardwell in 1868.

Sad Story Of Jack Courtney And His Jeep

FAIRBANKS, Alaska.—It was one of those chain reaction things, so the said story of Jack Courtney might as well start from the beginning. To enumerate:

1. He stopped his jeep by an empty cabin about 47 miles from here.
2. He drained the watery gasoline out of the jeep and put it into cans he found in the cabin.
3. He lighted a cigarette.
4. His gloves caught fire.
5. He tossed them to the ground where they ignited a small pool of spilled gasoline.
6. The gas and glove flames spread to the tires of his jeep and set them afire.
7. Two Fairbanks firemen on their day off drove up, stopped, and prepared to launch into some off-duty fire-fighting.
8. He hopped into the jeep to drive it away from the house—then discovered the jeep was out of gas.
9. The other fireman dashed to his automobile to get a fire extinguisher—and discovered he was out of fire extinguishers.
10. The flames meanwhile consumed the jeep, then devoured the cabin right down to the last log.
11. Courtney hitch-hiked a ride back to town.

Salada Tea Company Award Prizes For Plowing

On a field swept by winds of almost gale force and intermittent sheets of rain, two Victoria County boys won first prize in the Salada Tea Inter-County Horse Plowing competition, major event on Thursday, October 12, at the International Plowing Matches being held near Alliston. While the weather resulted in a much smaller crowd than the previous record breaking day, all competitors agreed that it made light loamy soil of six hundred acre Nottawasaga Valley Farms just about perfect for plowing.

Thirteen year old Ivan Bell of Kirkfield had the highest number of points though the other member of the Victoria team, his cousin, Gerald Bell of Woodville was not far behind. The Wentworth County team consisting of—George Markle, Aliberton and Tom Braithwaite of Ancaster won second place. These four boys, with a trip manager to be appointed by the Ontario Plowmen's Association, will make a tour of agricultural and conservation projects in the eastern United States next spring as guests of the Salada Tea Company of Canada, Limited.

Other Winners in this event for boys are as follows:
Grey County—Beverley Brown of Ayton and Mac Gamble, Owen Sound; Haldimand—Harold Nixon of Hagersville and Wray Richeld of Cayuga; Wellington—Archie Crobble, Guelph and Lindsay Love, Guelph; Waterloo—David Taylor, Galt and Calvin Hondrich, New Hamburg, and Brant County—W. Silversmith and Carmen Porter of Ohsweken.

Smile Of The Week

Voice: "How do you feel this morning?"
Second Voice: "Fine."
Voice: "I guess I have the wrong number."

To Open R.C.A.F. Flying School At Gimli, Man.

OTTAWA.—A new R.C.A.F. flying school is to be opened in December at Gimli, Man., it was announced by Defence Minister Brooke Claxton. Gimli is about 50 miles north of Winnipeg, on the south-western shore of Lake Winnipeg. The new training centre will be known as No. 2 Flying Training School, and the first intake of student pilots is expected to arrive early in January, 1951.

Opening of the new school will give the R.C.A.F. two basic pilot training centres. Since the war's end basic pilot training in the R.C.A.F. has been centered at No. 1 Flying Training School, Centralia, Ont. The Centralia school will continue operations, the expansion of the Air Force and the training of British and other North Atlantic Nation's aircrew necessitating two schools of this type.

An advance party of R.C.A.F. personnel from Training Command Headquarters, Trenton, and North West Air Command Headquarters, Edmonton, now is at Gimli, examining requirements for establishing the new school. Training Command will officially take over the station from North West Air Command December 1, and the initial entry of student pilots is expected to arrive January 5. A second intake, including Royal Air Force trainees, is scheduled to arrive at the end of January.

The new school will operate along the same lines as No. 1 FTS at Centralia. Student flight cadet pilots will be trained on single engine Harvards and will be awarded their wings at the school, on finishing the course.

Since the war's end Gimli has served as a summer camp centre for western auxiliary squadrons and for air cadets from the prairie provinces. Throughout the rest of the year the station has been held on a care and maintenance basis. Activation of the FTS at Gimli will not affect the summer training programmes of the western auxiliary squadrons and air cadets, although it may be necessary to transfer some of this activity to other points.

PICKED HARD WAY FOR FREE RIDE—A dare-devil aerial stowaway, Cliserio Reyes Guerra, endangered the lives of 23 aboard a plane in flight from Torreon, Mexico. Guerrero (top) shows how he rode the planes' stabilizer until the pilot noted unusual vibration and returned to the airport. At left, he wears his protective cap, goggles and handkerchief.

Hitches Ride

Boy Ascends 12,000 Feet Hanging On To Tail Of Plane

MEXICO CITY.—A Mexican farm boy hitched a ride on a Lamsa airliner in central Mexico. Nineteen-year-old Cliserio Reyes Guerra just took hold of the tail of the plane as it prepared for a take-off from Torreon and hung on.

Reyes managed to keep his hands and feet off the movable tail surfaces and veteran pilot Jorge Guzman didn't notice anything wrong until the plane had taken off, climbed to 12,000 feet and was levelling off for the flight into Mexico City.

Then, airline spokesmen reported, Guzman found the ship "excessively tail heavy" and returned to Torreon.

Reyes was standing on the right horizontal stabilizer of the plane, hanging on with all his might to the leading edge of the rudder when the plane landed. His clothes were "all but torn off" and he was half frozen by the wild midnight ride.

Officials said the plane was in the air 53 minutes.

Reyes commented: "I always wanted to ride an airplane."

KITCHEN MEDITATIONS FARAWAY FIELDS ARE GREEN

By JANE DALE

Sometimes I think that other skies are fairer far than these;
Sometimes I think that faraway fields are blessed by a gentler breeze,
And that the love of distant folk has more lasting qualities.

I fret for things beyond my reach.
Spoil many a worthwhile day
By clamouring for the might-have-beens as I blindly go my way,
And miss the beauty and the love spread out in sweet array.

There comes a time of deepest pain;
A night of dark despair,
Followed by morning's gracious light;
A dawn so glorious, fair,
Then closest fields are green and nearest skies are blue,
And I find contentment there.

RARE MUSKRAT SKIN

GRANDE PRAIRIE, Alta.—A rare white muskrat skin is the prized possession of Walter Figgures, fur buyer for the Hudson's Bay company here. The albino muskrat was caught by Gene Gerwatoski on his registered trap line.

Water under ice is warmer than frozen ground.

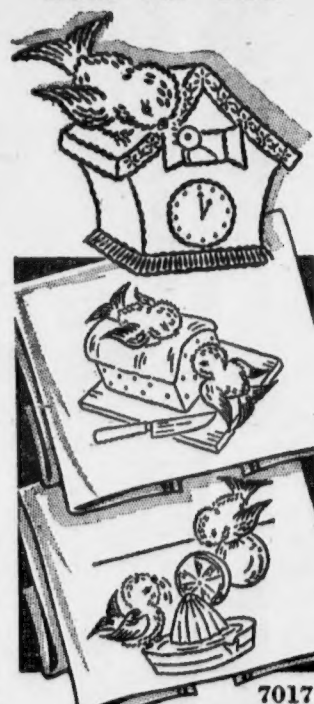

—Central Press Canadian.

NEW TROOPSHIP—The 19,600 ton ship, President Adams, a speedy luxury liner which is being finished as a troop transport, is shown going down the ways at the Camden Yards, N.J. Both Canadian and U.S. shipyards have received new orders in the increased armed forces allotments.

Be sure to write plainly your Name, Address and Pattern Number.

It's the best ever—our latest Alice Brooks Needlework catalogue! Send twenty-five cents in coins for your copy. Illustrations of designs for crocheting, knitting, embroidery, toys, quilts, children's clothes. Free needlework pattern is printed in book.

The Department of National Health and Welfare says that children need plenty of freedom for open-air games and sports. They need to run, jump, skip and climb if their bodies are to develop healthfully and their minds normally.

OUR COMPLETE SHORT STORY—

THE UNWANTED

By LEE S. PEEL

Outwardly she looked calm, but inside she was beginning to fret.

WHAT madness, this waiting! Marcia's eyes were fixed on the door across the hall. It was a solid door. It represented strength, unlike the man who lay inside on a white table, covered with a white sheet and surrounded by men and women in white. The closed room held her dying husband. Only the muffled sounds of the nurses and doctors penetrated Marcia's excitement-fogged mind, a mind that was busy planning the next move.

A nurse appeared in the door, silent and forboding. "She was tall and straight and white. She was like a ghost walking, adding to this nightmare of madness."

"He will live, won't he?" Marcia cried at last, desperate to break the silence. "Oh, dear God, he must."

She covered her eyes with a handkerchief and began to sob aloud again. False tears they were. Faked sorrow this was. But tears would add color and so she cried.

The nurse stood over her, waiting. When the sobbing grew fainter, she spoke: "We can't tell yet, Mrs. Morgan. Your husband has internal injuries. They are serious." Then she was gone. Marcia looked up. Gone, this ghost gone!

Marcia wondered, then if she suspected anything. But how could she? She put away her handkerchief and and got out her powder. She looked at herself in the mirror, then combed her hair and did her lips. Outwardly she looked calm, but inside she was beginning to fret. This was madness, waiting. It was greater madness, trying to commit murder.

They must be operating by now, she thought. At last he must be under the hot lights. The smell of ether. The gleaming instruments. Hawk-like eyes of doctors probing in the ruins, fitting mending, and sewing. Trying to save the unwanted.

Marcia felt no remorse. He had it coming. He was as guilty as Ellen. Marcia hated Ellen. Ellen with her dishwater hair and scotch and soda eyes. They were as ugly as this madness which possessed Marcia. But Ellen's was a kind of madness, too, trying to take another woman's husband.

How ironic it was, she thought, that Ellen should be the very one to sell her the arsenic at the drug store a week ago. It had been very simple. Ellen had asked no questions. There were rats in the basement, Marcia had said. That was another thing about Ellen. She was simple and stupid. Marcia wondered how she would take this. It would be good to see her face when she heard about poor Steve. Positively touching.

Marcia looked away from the door. In her mind's eye every detail shaped up again. Every detail pointing to this inevitable climax. Poor Steve, indeed! If he'd only known what was carefully stored away in the kitchen cupboard. The funny part of it was that he had liked the cake, had even remarked about the sugar filling. And the auto trip across town to his grandmother's. Marcia had planned that, too. She'd had him call the old lady and tell her that he was coming. Everything she planned and timed perfectly. The time the poison would take effect. The time the accident would take place downtown. She knew he'd have that accident. She missed guessing the intersection by only a block.

She got out her compact again. More color, she thought. And all the while she listened for a sound from within that would mean it was at last all over.

When the door suddenly opened,

she got quickly to her feet. A nurse she hadn't seen before walked swiftly past. Then came the surgeon, dripping with sweat and looking exhausted.

"He is dead?" Marcia moaned, "I can tell by your face."

The doctor took out a handkerchief. He wiped his forehead. "But, madam," he said, "he isn't dead. He's going to live. He had a bad stomach wound but that was all. We'll have to feed him with a tube for a while. After that he'll be alright. The ambulance driver said the other man was drunk. Did you know...?"

Marcia became weak, weak with madness. "You say his stomach, but wasn't there—I mean—didn't you see—?"

"He'd had a good deal to eat. I must say you do feed him well." The doctor smiled. "It's a wonder he hadn't indigestion. I've never seen such a mess of undigested flour in a man's stomach in all my life."

Manitoba Gets Health Grant Of \$15,300

OTTAWA. — The federal government has allotted \$15,300 from its national health grants to improve public health services in Manitoba, the health department announced.

An amount of \$8,500 has been set aside to provide improved laboratory and X-ray services to the 10,000 residents in and near the Roblin and Grandview areas.

Another \$2,500 will be used to buy equipment and to pay the salary of a laboratory technician for the health unit at Dauphin. About \$2,000 will be used to buy special equipment for the Manitoba sanatorium at Ninette. More than \$2,000 has been allotted to buy films and filmstrips to extend health education.

THOSE TRACTORS JUST KILL A MAN

WINNIPEG. — Angus M. McKay of suburban North Kildonan who has lived all his life in Manitoba celebrated his 88th birthday recently.

And this former farmer said he probably wouldn't be here if there'd been tractors in his youth.

He always used to rest himself whenever he fed his farm horses. But tractors don't need a break.

"The tractor will kill the man," he said.

Eager For Military Training
VANCOUVER. — Students at the University of British Columbia appear more eager for military training than at any time since the war ended. The Canadian officers training corps there has four times as many applicants to date this year than in the same period in 1949.

Conference Delegates Return

The national president of the Federated Women's Institutes of Canada, Mrs. H. F. Morton, of Vegreville, Alberta (right) and Mrs. A. B. McGorman, of Penfold, Alberta, president of the Alberta Women's Institutes arrived in Quebec City recently aboard the Empress of Scotland from Liverpool and Greenock. The two, along with some 37 Canadian delegates from across Canada are returning home from the recent conference of the Associated Countrywomen of the World held at Copenhagen, Denmark, at which Mrs. Morton was elected to a vice-presidency. Formed in 1930, the organization has some six million members, 100,000 of which are Canadians and represents 102 women's organizations in some 21 countries.

WESTERN BRIEFS

Sets Record For 'Mums

MEDICINE HAT. — This city, with the second greatest acreage of greenhouses in Canada, grows more chrysanthemum than similar hot house centres of Eastern Canada, said Dr. A. P. Chan, senior horticulturist in charge of floriculture for the Dominion, when he was in the city recently.

Whistling Swans

CRANBROOK, B.C. — A large flock of whistling swans filled the night with noise here recently, when apparently fascinated by the concentration of lights over the business section, they wheeled over the city again and again. When dawn came they alighted at a nearby marsh. After resting and feeding the birds formed a crescent and flew away.

Development Studied

REGINA. — A report now under study by the provincial agriculture department says it should be possible to develop horticulture and agriculture in northern Saskatchewan's Churchill river basin to about the same extent as the Peace River district of Alberta.

Quarter Million Found

VANCOUVER. — George Young was surprised when he opened a small, black pouch which he found on a downtown street. In it were a quarter of a million dollars worth of bank transfer cheques. They were not negotiable. The pouch had been lost by an office girl from the Canadian wheat board.

To Mark Boundary

EDMONTON. — A survey of the east-west boundary between Alberta and the North West Territories will start next month. Federal and provincial survey officials say. Although the 60th parallel of latitude is the official boundary, the actual position of the boundary line has never been located.

Gets Contract

HIGH RIVER, Alta. — Mr. and Mrs. Hope Hunter of High River have completed a contract with the R.C.

M.P. for making 2,000 nylon lanyards, for attaching to revolvers.

Establishes A Museum

MACLEOD, Alta. — The local Chamber of Commerce is sponsoring establishment of a museum at Macleod to be representative of southern Alberta. An old cannon from Fort Whoop-Up and Indian arrowheads and other old West records have already been purchased for the museum.

Still Unconscious

VERMILION, Alta. — Marvin Osbaldeston of Vermilion, Alberta, has entered his 130th day of unconsciousness. Injured in a traffic accident June 10, he has not shown any conscious reaction since that time. A brain operation in July had no effect. In hospital he yawns, perspires when warm, stretches his arms and legs and swallows liquids spooned into his mouth.

Returned For Fifth Time

GRAVELBOURG, Sask. — S. M. Bonneau, was re-elected mayor of Gravelbourg by acclamation at nominations here for his fifth term, and fourth time by acclamation.

CHAMPIONSHIP AWARDS

TORONTO. — World championships in wheat, oats, barley, corn, potatoes and rye will be awarded at the Royal Agricultural Winter Fair Nov. 14-22. 2905

Largest Sheep Sale Ever Held In Saskatchewan

MAPLE CREEK, Sask. — The largest sheep and lamb sale ever held in Saskatchewan was conducted at Tompkins recently. A total of 2,859 ewes, lambs and rams were sold for \$58,147.

Alberta buyers paid up to \$30 a head for ewes, while two-year-olds sold for \$31 to G. S. Hawkins, Moose Jaw. Three and four-year-olds brought \$26, with five-year-olds selling at \$4 less. Even older ewes averaged over \$16.

University of Saskatchewan's top rams sold up to \$135 a head for the first eight offered, and \$126 a head for the next six.

Though the pet lamb sale attracted 42 entries, the youthful owners hesitated to let their pets go under the auctioneer's hammer even for \$24 per cwt. They were sold to Lethbridge Feeders.

Saskatchewan Draft Employee Pension Plan

REGINA. — Proposed legislation to set up a contributory pension scheme for all employees of cities, towns, villages and school units in the province was reviewed by the executive of the Saskatchewan Urban Municipalities association.

The pension scheme, still in draft form and expected to come before the provincial legislature at its next session, calls for employee-employer contributions to provide pension for men retiring at 65 and women at 60.

Consumer Credit Regulations

EFFECTIVE NOVEMBER 1, 1950,

instalment sales of consumer goods at retail and loans for the purchase of consumer goods at retail will be subject to new Consumer Credit Regulations. This action has been taken under the Consumer Credit (Temporary Provisions) Act as passed by Parliament.

The Regulations apply to every person engaged in the business of selling consumer goods at retail on credit, in the business of making loans, or otherwise engaged in financing the purchase of consumer goods.

The following requirements will be in effect when retail sales are made on the instalment plan on and after November 1, 1950:

	Minimum down payment	Maximum time to pay
Motor vehicles (e.g. passen- ger automobiles and motorcycles).....	33⅓%	18 months
All other consumer goods.	20%	18 months

In no case shall the down payment be less than \$5.00.

INSTALMENT PAYMENTS are to be in regular, approximately equal, amounts of not less than \$5.00 monthly or \$1.25 weekly. Instalment payments may be varied to meet the circumstances of persons such as farmers and commercial fishermen whose incomes are subject to seasonal fluctuations.

Similar terms apply to loans granted by banks or loan companies for the purpose of purchasing consumer goods at retail.

SPECIAL PROVISIONS ARE INCLUDED WITH REGARD TO REVOLVING CREDIT ACCOUNTS, permanent budget accounts, current budget accounts, and similar plans involving payment for goods by regular instalments.

ORDINARY CHARGE ACCOUNTS ARE NOT DIRECTLY AFFECTED by the present Regulations, but steps will be taken, if necessary, to see that charge accounts are not used to evade the regulations relating to instalment sales.

THE REGULATIONS REQUIRE SELLERS, LENDERS AND FINANCE COMPANIES to maintain records of transactions, to make them available for inspection, and to furnish information on request to authorized representatives of the Government of Canada.

CONSUMER GOODS include all goods with certain exceptions. A full list of the exceptions will be found in the Regulations.

For example, the Regulations DO NOT APPLY to sales of real estate, stocks, bonds, securities, goods for professional or business use, buses, trucks, building materials, implements and equipment used exclusively in farming and fishing.

Penalties are provided for violation of the Regulations.

Douglas A. Ross

Minister of Finance

For the convenience of the public, copies of The Con-sumer Credit (Temporary Provisions) Act and Con-sumer Credit Regulations will be available at branches of the Chartered Banks throughout Canada.

Inquiries and requests for additional copies should be addressed to:

Administrator of Consumer Credit,
490 Sussex Street, Ottawa, Ontario.
